

Rotator from 10T351 - 360° endless

1 hydraulic function

Specification:

For extra heavy cases: the KAUP Rotator 360° endless from 10T351. It owns an especially high torque and can use also heavy loads easily as carriages for example.

Attachment rotates hydraulically by 360° endless in both directions.

Attachment is serially designed without sideshift. It can be fitted with separate or valveblock sideshift upon request.

Attachment is operated hydraulically, i.e. supplied with oil from the forklift truck's hydraulic system. Truck requires one additional hydraulic function.

Attachment serially equipped with cylinder and sideshift protection.

Attachment supplied serially without forks. All forks in accordance with ISO 2330 can be used. Matching forks model T180 are available.

Rotator from 10T351 - 360° endless

Technical specifications

Model							
10T351	12.000	900	28.000	15	440	250	1.910
15T351	15.000	900	56.000	30	450	460	2.335
20T351	22.000	900	60.000	60	465	350	3.650
25T351	24.000	1.200	60.000	60	465	270	4.850
30T351	28.000	1.200	90.000	120	465	270	4.940
35T351	25.000	1.600	90.000	120	495	305	5.490
42T351	30.000	1.600	90.000	120	505	325	5.840
52T351	36.000	1.600	120.000	240	525	500	7.040

Qualities:

- Good visibility conditions
- Good residual capacity
- High torque
- Rotation 360° endlessly
- Robust construction with gear drive
- Lateral supporting fork and load stabilizers optionally

- With sideshift function model T391 available upon request. Other capacities available upon request.
- Other capacities available upon request.
- 1) CofG and weight measurements do not take the forks into account.
- In order to draw up an exact quotation for a large rotator to meet your requirements we require detailed information. Therefore it is advisable to contact our project team directly for a quotation.
