

Pusher T141S, T142S ¹⁾

Pusher with pallet retainer T142S 2 hydraulic functions

Specification:

KAUP Pusher T141S¹⁾ and Pusher with pallet retainer T142S are part of the KAUP Push-Pull range of products. Contrary to palletless loading, using this attachment the load is either pushed completely with the wooden/plastic pallet (T141S) or separated from the wooden/plastic pallet (T142S).

Pushers are mounted directly on to the fork carriage between the existing forks and can be combined with other KAUP attachments.

Attachment is operated hydraulically, i.e. supplied with oil from the forklift truck's hydraulic system. Truck requires one additional hydraulic function.

Attachment is operated hydraulically, i.e. supplied with oil from the forklift truck's hydraulic system. Truck requires two additional hydraulic functions.

Attachment is serially designed without sideshift. It can be fitted with separate or valveblock sidesift upon request.

Attachment supplied serially without forks. All forks in accordance with ISO 2330 can be used. Matching forks model T180 are available.

Pusher T141S, T142S ¹⁾

Qualities:

- Solid construction
- Good visibility conditions through the attachment
- Good residual capacity
- Self supporting scissor system
- Different lengths of forks useable
- Multi-fork pushers available upon request
- Combination with other attachments - for example sidershifters - possible

- Forks are not included.
- 1) Pusher T141S - 1 hydraulic function
- 1) Pusher with pallet retainer T142S - 2 hydraulic functions
- Forks see model T180.
- To choose the right fork length please consider dimension „V“ of the pusher.
- Multi-fork pusher T141S/180 available upon request.
