Rotating Fork Positioner T456BZ

Rotation 360° continuous - 2 hydraulic functions

Specification:

This attachment combines the advantages of two KAUP series: Rotators and Fork Positioners. With the 1000-fold proven basic components of the KAUP modular system the result is a robust device with numerous different application possibilities.

Attachment rotates hydraulically by 360° endless in both directions.

Attachment is serially designed without sideshift. It can be fitted with separate or valveblock sidesift upon request.

Attachment is operated hydraulically, i.e. supplied with oil from the forklift truck's hydraulic system. Truck requires two additional hydraulic functions.

Attachment is available for operation in explosion hazardous areas.

Attachment is specially designed for the function fork positioning and is not suitable for clamping between the forks.

Rotating Fork Positioner T456BZ

Qualities:

- Good visibility conditions
- Rotation 360° endless
- Solid construction
- Attachment also available with screw-on forks
- Optionally available with sideshift
- Larger models and construction widths optionally available

- Md: Torque at dP = 125 bar.
- Larger models and different widths available upon request.
- Also available with bolt-on forks: T456BZA
- Also available with sideshift, model T496BZ on request
