Rotating Roll Clamp T458BC-2

360° rotation continuous - short arm fixed - 2 hydraulic functions

Specification:

With the view-optimised designed KAUP Rotating Roll Clamp T458BC-2 all kinds of roles can be taken up carefully and be advanced. The contact pad of this attachment is divided and allows in such a way that at the same time two rolls - also with different diameters - can be transported stacked. This makes this attachment everywhere inalienable where the handling of paper rolls, concrete tubes and similar one is essential.

Attachment rotates hydraulically by 360° endless in both directions.

Attachment is operated hydraulically, i.e. supplied with oil from the forklift truck's hydraulic system. Truck requires two additional hydraulic functions.

Attachment is serially designed without sideshift. It can be fitted with separate or valveblock sidesift upon request.

Attachment can be fitted with different types of contact pad surfaces specifically suited to the application.

Attachment is available restricted to 180° rotation.

Rotating Roll Clamp T458BC-2

Qualities:

- Very good visibility conditions
- Favorable lost load and weight
- Solid, slender arm construction
- Different contact pad coatings available
- Rotation 360° endlessly
- Limitation on rotation 180° optionally
- Service friendly

- Optional: contact pad coatings (standard polyurethane coating Poly-1)
- Capacity related to max. roll diameter.
- For taking up horizontal rolls, 5-degree mast forward tilt is required.
- Optional: restricted to 180° rotation, Tissue version, short arm with continuous contact pads.
- Pressure plate coverings see under accessories.
- Attachment with sideshift Model T498BC-2 (add-on price).
