

Fork Positioner for reach trucks T160BZ

Without sideshift - 1 hydraulic function

Specification:

KAUP, as leading manufacturer of attachments, also has a comprehensive range of attachments for Reach Trucks. The Fork Positioner type T160BZ is one of them. Individual details regarding wheel arms and ground clearance as well as the possible width of the attachment and other technical details make Reach Trucks very complex. Therefore it is advisable to contact our specialists directly for an individual consultation regarding our attachments and accessories for Reach Trucks.

Attachment is serially designed without sideshift. It can be fitted with separate or valveblock sidesift upon request.

Attachment is operated hydraulically, i.e. supplied with oil from the forklift truck's hydraulic system. Truck requires one additional hydraulic function.

Attachment can be fitted with load backrest model T479. The load backrest model T479.1 is suitable for fork positioners T160B and T466B up to 4.8T.

Attachment supplied serially without forks. All forks in accordance with ISO 2330 can be used. Matching forks model T180 are available.
