

Height adjustable fork T158

Specification:

The height adjustable fork T158 of KAUP is hung up directly in the ISO carriage and serves as a level compensator. If two height adjustable forks are used at the same time, an additional heave occurs. Height adjustable forks are used together with a hook-on fork.

Attachment is operated hydraulically, i.e. supplied with oil from the forklift truck's hydraulic system. Truck requires one additional hydraulic function.
