

Sideshifter with increased sideshift stroke T151P-C

Sideshifter for container stuffing applications - 1 hydraulic function

Specification:

The KAUP Container Sideshifter T151P-C simplifies loading and unloading of containers. This attachment with increased sideshift stroke makes it possible to reach beyond the chassis width of the forklift truck and place loads close to the container wall.

Attachment is operated hydraulically, i.e. supplied with oil from the forklift truck's hydraulic system. Truck requires one additional hydraulic function.

Attachment can be fitted with load backrest model T179.

Attachment is available for operation in explosion hazardous areas.

Attachment supplied serially without forks. All forks in accordance with ISO 2330 can be used. Matching forks model T180 are available.

Sideshifter with increased sideshift stroke T151P-C

Sideshifter with increased sideshift stroke T151P-C

Qualities:

- Optimal utilisation for container loading
- Ideal for confined spaces

- 1) Differing shift strokes available upon request.
- Higher capacities and other construction widths available upon request.
- Load Backrest see model T179.
- 2T151P4N-C with EASYSLIDE greasable sliding pads
- Bottom brackets with roller guidance (SMOOTHROLL).
- Optional in explosion proof version
