

Rotating Drum Clamp T455-1

Specification:

The KAUP Rotating Drum Clamp T455-1 guarantees the safe transport of cylindrical steel barrels under all working conditions of a forklift like the acceleration, (curves) driving and braking. In addition, the sure lifting, rotating and emptying of these transport units becomes possible with this attachment.

Attachment rotates hydraulically by 360° endless in both directions.

Attachment is operated hydraulically, i.e. supplied with oil from the forklift truck's hydraulic system. Truck requires two additional hydraulic functions.

Attachment is available for operation in explosion hazardous areas.

Attachment can be fitted with different types of contact pad surfaces specifically suited to the application.

Rotating Drum Clamp T455-1

Technical specifications

Model									
1T455-1	700	320	420-1.600	970	6.013	2	216	146	305

Qualities:

- Good visibility conditions
- Stable construction
- Arms covered with Remagrip
- Optionally other arm pads
- Rotation 360° endlessly
- Optionally with sideshift available
- Implementation for plastic barrels optionally

- The arms are coated with Remagrip (see coatings in the pricelist).
- special designs available for transportation of plastic drums (upon request)
- This version is for cylindric drums with diameter of 600 mm. For other diameters on request.
- Also available with sideshift, model T495-1 on request
